

NewsIntel — Cookie Policy

Global Staffing Support B.V. (“GSS”) — www.newsintel.eu

Effective date: 1 September 2026

1. What this policy covers

1.1 Who publishes it

This Cookie Policy explains how **Global Staffing Support B.V.** (“GSS”, “we”, “us”) uses cookies and comparable technologies on our public website at www.newsintel.eu and all of its subpages, including the pricing, contact, legal and cookie-settings pages (the “**Website**”).

GSS is a private limited liability company incorporated under the laws of the Netherlands, registered with the Dutch Chamber of Commerce under number 09132165, VAT number NL811925225B01, with its registered office at Kraailandhof 63, 3828 JP Hoogland, the Netherlands. Our full company details are in the **Imprint**.

1.2 What “cookies” means here

“Cookies” in this policy means cookies in the strict sense and any other technology that stores information on your device or reads information already stored there — including local storage, session storage, pixels, tags, software development kits (SDKs) and device fingerprinting. Under Art. 11.7a of the Dutch Telecommunications Act and Art. 5(3) of the ePrivacy Directive the same rule applies to all of them, whatever the technical mechanism. Every item in §3 is therefore listed with its actual mechanism, not lumped together as “cookies”.

1.3 What this policy does not cover

This policy covers the public Website only. It does not cover the NewsIntel customer application at app.newsintel.eu, which has its own sign-in, its own browser storage and its own third-party components. The application is the “Service” as defined in **Privacy Policy §1** and in the **Terms of Service**.

1.4 Relationship to the Privacy Policy

This policy is about the placing and reading of information on your device. What we then do with any personal data obtained that way — the purposes, the legal bases, the recipients, the international transfers and your rights — is described in our **Privacy Policy** (<https://newsintel.eu/privacy.html>), in particular §3 (Website visitors), §9 (recipients and sub-processors), §10 (international transfers) and §11 (your rights).

2. The rule we apply

Category	Consent needed?	Status on this Website today
Strictly necessary	No	One item only: the record of the choice you make in the banner. See §3.1.
Functional / preference	See §4	None. This Website stores no language, theme or interface-state preference.
Analytics / statistics	Yes	None. No analytics technology of any kind is loaded on this Website. See §5.
Marketing / advertising	Yes	None, and none is planned. See §6.

Non-essential cookies are not placed before you have made a choice. As things stand, this commitment is satisfied trivially, because we place none at all.

The banner presents two options:

- **“Accept all”** — records your agreement to the analytics category described in §5. Because no analytics technology is currently present on this Website, choosing it does not cause anything additional to be placed on your device.
- **“Essential only”** — records your rejection of every non-essential category.

Rejecting is exactly as easy as accepting: one click either way, both buttons carry the same visual weight, no pre-ticked boxes and no dark patterns. We do not use a cookie wall, we do not withhold any part of the Website from you on the basis of your choice, and we do not treat continued scrolling or navigation as consent.

3. What is stored on your device by this Website

3.1 First-party storage

One item, and one only:

Name	ni-cookie-consent
Mechanism	Local storage (first party). Not an HTTP cookie.
Purpose	Records whether you chose “Accept all” or “Essential only”, the time at which you chose, and the version of the banner you were shown.
Basis	Exempt from the consent requirement — storage strictly necessary to deliver a service you have expressly requested, Art. 11.7a(3) Dutch Telecommunications Act. Recording the choice is also what allows us to honour it.
Stored for	Until you change your choice or clear your browser storage. No automatic expiry is applied and the banner does not re-ask. See §9.

That is the complete list of first-party storage set by this Website. This Website has no sign-in: signing in takes you to the separate application. It therefore sets no session cookie, no refresh cookie and no CSRF cookie.

3.2 What this Website does not set or load

Stated positively so that the absence is on the record:

- No third-party fonts, scripts, stylesheets, frames or other third-party resources. Typefaces are served from our own servers, so opening a page of this Website does not cause your browser to connect to any third party, and no third party receives your IP address or the address of the page you are viewing.
- No session, refresh or authentication cookie — there is nothing to sign in to here.
- No CSRF cookie. The contact, sample-request and newsletter forms submit to an API and do not rely on a browser cookie for cross-site request protection.
- No language, theme or interface-state storage. The language indicator in the footer is display-only and writes nothing.
- No analytics cookie, script, tag or SDK (§5).

- No advertising, retargeting, social-media or cross-site profiling technology (§6).
- No device fingerprinting.

4. Functional and preference storage

This Website stores no functional or preference data on your device.

Should we later add a preference of that kind — remembering a chosen language, for example — it will be treated as exempt from consent on the basis that it stores an instruction you actively gave and nothing else (Art. 11.7a(3) Dutch Telecommunications Act), it will be listed in §3.1, and it will be described here.

5. Analytics and statistics

5.1 We currently place none

No analytics or statistics technology is loaded in your browser on this Website. There is no Google Analytics, no Amplitude browser SDK, no Sentry browser SDK, no session replay, no heat-mapping and no tag manager. This is true whichever option you choose in the banner.

5.2 What the banner does today

The banner records your choice so that, if and when we introduce analytics, a rejection already given is honoured from the outset rather than being asked for again. Until that happens, choosing “Accept all” changes nothing about what is placed on your device.

5.3 Amplitude and Sentry

We use Amplitude for product analytics and Sentry for error monitoring in connection with the customer application and our own servers, not on this Website. Neither places a cookie or any other storage in your browser when you visit this Website. The forms on this Website — the contact form, the sample-article request and the newsletter subscription — do not generate analytics events on our servers either.

Both providers are described in the **Privacy Policy** — where they belong, because what they do is server-side processing of personal data rather than storage on your device — and the transfer mechanisms that apply to them are set out in **Privacy Policy §10**.

6. Marketing and advertising

We use none. We place no advertising, retargeting, social-media tracking or cross-site profiling cookies, we embed no advertising pixels, and we do not sell or share personal data for advertising purposes. If this ever changes, this policy will be updated and consent will be requested before any such technology is placed.

7. Links to third-party services

This Website links out to third parties; it does not embed them.

- **Demo booking.** “Book a demo” opens our scheduling provider, Cal.com, in a new browser tab. The scheduling widget is not embedded in this Website, so it sets nothing on newsintel.eu. Once you are on Cal.com’s own site, Cal.com’s cookie notice and privacy policy govern what happens there.
- **Sign-in.** The sign-in link opens the customer application on a different domain. What that application stores is outside the scope of this policy (§1.3).

Our rule for the future. Where we embed third-party media or a third-party widget directly in a page of this Website, we will place it behind a click-to-load placeholder, so that no third-party cookie is set unless you activate it. No such embed exists today, so this is a commitment about future behaviour rather than a description of a control that is already running.

8. How to change your choice, and how to manage cookies

On this Website

You can change or withdraw your choice at any time on the **Cookie settings** page (<https://newsintel.eu/cookie-settings.html>), linked in the footer of every page. Withdrawal is as easy as consent and takes effect immediately. Because no analytics technology is loaded on this Website, there is at present nothing for a withdrawal to delete; if we introduce analytics, withdrawing will delete anything already set as well as stopping anything further.

In your browser

You can block or delete cookies and clear local storage through your browser settings; the major browsers each publish instructions. On this Website the only consequence is that we forget the choice you made and the banner asks again. Nothing else on this Website depends on browser storage. Blocking storage will, separately, prevent you from staying signed in to the customer application, which is a different domain and a different notice.

9. How long your choice is kept

Your choice is stored in your browser's local storage and stays there until you change it or clear your browsing data. We do not currently apply a maximum period, and the banner does not automatically ask again. We keep no copy on our servers: the record exists only in your browser, so clearing your browser storage erases it completely and we retain nothing.

10. Contact

Questions about cookies and about this policy: privacy@newsintel.eu. We reply to enquiries within one business day.

Full company details are in the **Imprint**. You also have the right to lodge a complaint with the Dutch supervisory authority, the Autoriteit Persoonsgegevens, Postbus 93374, 2509 AJ Den Haag, the Netherlands (autoriteitpersoonsgegevens.nl), or with the supervisory authority of your country of residence or place of work.
