

NewsIntel — Sub-processors

Annex III to the NewsIntel Data Processing Agreement

Effective date: 1 September 2026

This page is Annex III to the NewsIntel Data Processing Agreement and lists the Sub-processors engaged by Global Staffing Support B.V. (“**GSS**”) for the Processing of Client Personal Data. Capitalized terms have the meaning given in the Data Processing Agreement (<https://newsintel.eu/dpa.html>).

Changes. GSS notifies each Client of any intended addition or replacement of a Sub-processor at least thirty (30) days in advance, by e-mail to the Client’s registered administrative contact and by updating this page. A Client may object on reasonable, documented data-protection grounds within fourteen (14) days. The full procedure, including the right to terminate where an objection cannot be resolved, is in DPA §7.4 to §7.6.

III.1 Infrastructure

Compute, database and object storage are operated by GSS on its own infrastructure; no third-party hosting or content-delivery provider Processes Client Personal Data.

Sub-processor	Legal entity & country	Service	Data categories
TransIP	TransIP B.V. — Netherlands	Verification e-mails, notifications and newsletter sending	Recipient e-mail address, name, message content

III.2 AI model providers

Sub-processor	Legal entity & country	Service	Data categories
OpenAI	OpenAI Ireland Limited — Ireland	Text generation; cover-image generation	Prompt content, source excerpts, configuration context

AI providers are bound by contractual restrictions on retention and on the use of submitted data for model training, as required by DPA §3.4 and §7.2.

III.3 Operations, payments and analytics

Sub-processor	Legal entity & country	Service	Data categories
Stripe	Stripe Payments Europe, Limited — Ireland	Subscription billing, SEPA direct debit and card payments, invoicing	Billing contact, company, VAT number, payment status; card data collected directly by Stripe
Sentry	Functional Software, Inc. d/b/a Sentry — United States	Error and performance monitoring	Error traces, technical metadata, sanitized context

Sub-processor	Legal entity & country	Service	Data categories
Amplitude	Amplitude, Inc. — United States	Product analytics (consent-gated)	Pseudonymous identifiers, event data, truncated IP
Cal.com	Cal.com, Inc. — United States	Demo and appointment scheduling (GSS-controller activity; listed for completeness)	Name, e-mail, booking details
DuckDuckGo	Duck Duck Go, Inc. — United States	Discovery of source material	Search queries derived from keywords

III.4 Client-enabled integrations

Where the Client registers a Channel or other delivery target operated by a third party, Articles and the Personal Data they contain flow to that system on the Client's instruction. That provider acts under the Client's own agreement with it and is not a Sub-processor of GSS; GSS Processes only the credentials necessary to operate the connection.

International transfers

GSS does not transfer Client Personal Data outside the European Economic Area, and does not permit a Sub-processor to do so, except on a valid transfer mechanism under Chapter V GDPR — an adequacy decision, including certification under the EU-US Data Privacy Framework where applicable, or the Standard Contractual Clauses supplemented by a documented transfer impact assessment. GSS maintains a record of the mechanism applicable to each Sub-processor listed above and makes it available to a Client on request (DPA §8.4).

Contact

Questions about this page, or a request for the transfer documentation referred to above: privacy@newsintel.eu.
